

A screenshot of a code editor interface, likely Visual Studio Code, displaying a PHP file named `web.php`. The file is located in the `routes` directory of a project named `TUGASW13`. The code defines a single route for the root path ('/').

```
1 <?php
2
3 use Illuminate\Support\Facades\Route;
4
5 Route::get('/', function () {
6     return view('cv');
7 });
8
```

The left sidebar shows the project structure, including the `routes` folder containing `console.php` and `web.php`, and the `resources` folder containing `views` (with `cv.blade.php`) and other assets like `0.png`.

A screenshot of a code editor interface, likely Visual Studio Code, displaying a file named `cv.blade.php`. The code is a Blade template for a CV page.
